

When 24 hour care is needed, there is no better value than HomeWell's Live-In Care Program. Not all clients are eligible for live-in care. In some cases hourly services may need to be provided. Only a HomeWell Senior Care Manager can determine if a client is eligible for live-in care. For a free no-obligation consultation call HomeWell today.

Live-In FAQ

For your convenience, we organized a short list of our most frequently asked questions:

Do your Personal Assistants actually move in?

No. The Personal Assistants work shifts. One shift is 24 hours, and a Personal Assistant may work up to 5 shifts per week. Another Personal Assistant may come in for an additional 2 days if 7 days of care and service are necessary each week.

Does the Personal Assistant sleep at night?

Yes. The HomeWell Personal Assistant may sleep at night. However, he or she is available to assist as needed.

Who uses Live-In Care?

Families who want someone there for mom or dad — during the day to make life more comfortable, and in the middle of the night in case something goes wrong.

Why do you call your care givers Personal Assistants™?

All members of HomeWell's field staff (regardless of training level) are called Personal Assistants, because many clients don't want "caregivers." They prefer to have someone available to assist them with life's daily activities. Our Personal Assistants consist of Nursing Assistants, Personal Support Workers, Nurses, Home Care Attendants, Companions and Homemakers.

Quality of life begins with quality in-home care...™
